

OUR FIBER FUELS GLOBAL INNOVATION

K-12

DENSE FIBER FOOTPRINT AND ENCOMPASSING PRODUCT PORTFOLIO DELIVERS WHOLISTIC, DEDICATED INFRASTRUCTURE TO K-12 INSTITUTIONS.

Zayo fuels global innovation for educational institutions

Zayo provides services to
8000+ Schools, Libraries and District Offices
for over **4 Million** Students

Zayo partners with
K-12 Entities in **23 States**

80% of all Texas students
are serviced by Zayo

Zayo is currently constructing **2000+ miles**
of fiber build for schools

Zayo is an E-Rate, Tier-1 leader focusing on leveraging all funding structures to build schools cost effective, future proof networks

Zayo has been an **active participant** in E-Rate for the last **8 years** and has become an **established leader** in dedicated fiber infrastructure and other Category 1 services.

Zayo has **provided E-Rate funded services** in **23 different states**, successfully navigating unique procurement criteria to deliver network on time and USAC compliant.

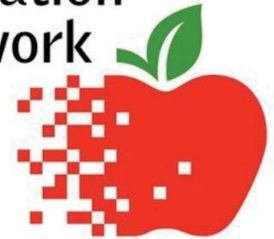

Zayo has been **awarded more USAC Special Construction dollars** than any other carrier participating in E-Rate with **over \$200M application requests**.

Zayo teams with the Cloud Service Providers to provide K-12 customers direct connectivity into the cloud

Zayo's K-12 solutions are high bandwidth with high security, since Zayo uses its owned dedicated network to underpin the service

High Bandwidth

Zayo's ownership of the underlying fiber infrastructure allows Zayo to seamlessly scale bandwidth over the lifetime of the service, meeting or exceeding USAC's per student bandwidth guidelines. Zayo's overall fiber network underpins the Tier-1 IP Backbone and connectivity to the Public Cloud Providers, such as Google and AWS, allowing Zayo to provide a wholistic, future-proof network.

High Security

By providing dedicated fiber throughout K-12 school districts and tying back Zayo's Tier-1 IP Core, Zayo provides the highest level of security to single subscriber district entities.

Cost Effective

Leveraging Zayo's owned end-to-end services to minimize the support and operations requirements, allowing school's to save considerable budget dollars when compared to the most competitive market rates from other carriers.

Next Steps

Let's set up a meeting to explore how Zayo can help plan and execute your K-12 ecosystem strategy. During that meeting, we can further discuss how Zayo's portfolio can support your needs through Dark Fiber, PDN, Internet Connectivity at schools and at home, Cloud Connectivity, DDoS, and SD-WAN.
